SUMMARY

Computer Science (AI/ML) student with strong foundations in Java, Python, Data Structures, Algorithms, and Full-Stack Development (MERN & PERN). Experienced in building scalable web applications, REST APIs, database-driven systems, and AI-powered solutions through academic and personal projects. Passionate about software engineering, problem solving, and developing efficient, reliable, and reusable software.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, SQL, C

Core Concepts: Data Structures, Algorithms, Object-Oriented Programming (OOP), REST APIs

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS

Backend: Node.js, Express.js, JWT Authentication, Middleware

Databases: PostgreSQL, MongoDB, Redis

Developer Tools: Git, GitHub, Postman, Hoppscotch, Chrome DevTools

PROJECTS

Enterprise Feature Flag Management System

React | Node.js | Express | PostgreSQL | Redis | JWT

Built an enterprise feature-flag platform for controlled feature releases using environment-based toggles and kill switches.

Implemented deterministic hashing for percentage-based rollouts and Redis caching to improve flag evaluation performance.

Designed a normalized PostgreSQL database schema for organizations, projects, environments, targeting rules, and audit logs.

Developed secure JWT-based authentication, middleware-driven role-based access control (RBAC), and a real-time management dashboard.

PlacementPro – AI-Powered Campus Placement System

React | Node.js | Express | MongoDB | Gemini API | Cloudinary

Developed a full-stack campus placement platform with role-based dashboards for Students, Recruiters, and TPOs.

Integrated the Gemini API to provide AI-powered resume analysis, ATS scoring, job description matching, and skill-gap identification.

Implemented JWT access and refresh token authentication using HTTP-only cookies and middleware-based authorization.

Built modules for job posting, eligibility verification, application tracking, interview scheduling, and placement analytics.

EXPERIENCE

IEEE Hackathon

Dehradun, India

Frontend / Web Developer

Developed an interactive Water Conservation Quiz Game to promote environmental awareness.

Designed a responsive user interface using React, HTML, CSS, and JavaScript for an improved user experience.

Implemented dynamic quiz logic, real-time score tracking, and interactive feedback mechanisms.

Skillnexus

Remote

Full Stack Development Intern

Developed full-stack application features using React, Node.js, Express.js, and database technologies during weekly development assignments.

Built and debugged front-end and back-end components while meeting project deadlines.

Implemented REST APIs and CRUD operations to solve assigned development tasks.

EDUCATION

Dev Bhoomi Uttarakhand University

Dehradun, India

B.Tech in Computer Science (AI/ML)

Aug 2023 – Present

SSC AU GIC SELAQUI

Dehradun, India

Class XII)

Completed in 2022

CERTIFICATIONS

AWS Certified AI Practitioner

Information Technology Specialist in Artificial Intelligence Certification - Certiport

Azure AI Fundamentals - Microsoft

Azure Data Fundamentals - Microsoft
